- Global

FASHION

- Girls Fashion
- Men's Fashion
- Kid's Outfit
- Shopping Places

SOCIAL TRENDS

- News & Trends
- Culture
- International News
- Trends on Social Media

PROJECT DESCRIPTION

We chose a lifestyle blog for our website project because blogging websites are the new craze in the market and the most popular among them are lifestyle blogs and naturally being having the largest number of websites they are one of the most beautifully designed ones too.

*“According to a recent **U.K. survey**, bloggers have ranked as the third most trustworthy source of information, following only friends and family. That's right -- bloggers are trusted more than celebrities, journalists, brands, and politicians and just for your information not only that but they have the most beautifully designed websites too”*

Lifestyles blog have modern, unique and user-friendly web design and most importantly they are aesthetically pleasing. While, making our project we kept all these points in our mind and created a website that we can thankfully say follow all the afore mentioned points

Our Website consists of **53 pages**, We designed a **logo** and **favicon** as well for the website (*all the reasons about why we chose Todo as our website name or why we followed a specific color theme are all carefully thought and selected and are all explained below*) Our website follows a color theme. All the **requirements set by Sir Ali Babar** has been met including the 50+ pages, 100+ images, slider and Javascript validation forms. Moreover, the website is completely **responsive** as well.

WEBSITE NAME & TAGLINE:

We wanted our website name to be unique, short and have a meaning behind it and that's exactly what we went for. We named our website Todo.

The word “TODO” is actually a Spanish word that means ‘everything’ and this is what all our blog is about. ‘Everything you need in one spot’

ABOUT TODO

Todo provides the up to date and trending content related to our lifestyles including but not limited to food, sports, gaming, travel, beauty, fashion & entertainment and many more categories, providing a good direction for life and many more things to set up a good lifestyle will be made available on Todo. We actually don't read people's mind but our content will make sure that we actually do! It's an all in one place to get 'everything' of what's happening around you. Let us share content created by us with the world, spreading love and smiles along with creating mutual understanding and harmony between people belonging to different schools of thought.

COLOR THEME:

The lifestyle blogging websites are more catered towards women but as times are changing everybody can venture into anything and that's what we wanted to focus on our website. Our website has content for both the genders that's why you won't be finding any of the feminine colors like pink in our website we wanted to be inclusive and color scheming plays a huge role in that. Aside from basic neutral colors are website has a bluish green shade and rosy brown shade (it's from purple family) for highlighting things and bringing things into notice and a bright gradient color for the pop that's used on our buttons and little info boxes.

- #4ab8b8;;
- #68666da;
- #0f0f0f;
- #ffffff;;
- #a26ea1;
- #9ab6d4;

& a gradient color: **linear-gradient(to top, #a18cd1 0%, #fbc2eb 100%);**

FONT FAMILIES:

- Abel
- Anton
- JosefinSans
- Lexend Deca
- Livvic
- Pacifico

USE CASES AND STAKE HOLDERS:

People of all language, color, gender and ages are welcome on our website, it is a global website that not only has content for Pakistani audience but has content for all the International audience as well. People having any kind of interests in life and surroundings will naturally gravitate towards this website. Elders, Adults, Young Adults, Teenagers this website is for everyone. Though I wouldn't say it would be interesting for kids but it's completely safe for them as well. As all our content though not made for kids but still is completely kids friendly and while the others can enjoy more informative content. The kids can browse through the gaming section 😊

'It's a website for everyone'

PROBLEMS AND LIMITATIONS

- One main limitation with our project is that it's not accessible offline.

SUPPORTING TOOLS (SOFTWARE AND LIBRARIES)

Languages used in the process of this project:

- HTML
- External CSS
- J-Query
- Javascript

Softwares used in the process of this project:

- Visual Studio Code as code Editor
- Sublime as code Editor

Libraries used in the process of this project:

- Animation On scroll library (for animations)
- Owl Carousel (for Slider)
- Google Fonts (for fonts)

Applications used in the process of this project:

- Google (for Project Research)
- Gmail (for Communication)
- Google Drive (for Files Storage)
-

METHODS AND PROCEDURES

- We made variable for fonts and colors, so we don't have to write the code for them again and again as they were used in many places.

- We downloaded font files so we don't have problem if we don't have access to Internet.
- Immediately saved our page as soon as we were done with one and kept multiple copies of the project at multiple places at all times, also saved them on online platforms so we don't lose our project

WORKLOAD DISTRIBUTION

Rameen:

- Decided why Lifestyle Blogging Website would be perfect for this project and came up with the idea for the website layout and website name.
- Did all the coding for the Website pages (except for 2 but provided content for those 2 pages as well and made some styling changes)
- Designed Logo and Favicon
- Wrote content and selected images for Home, Food, Travel and Beauty Categories
- Wrote Content for FAQ, About US, Charity pages
- Made the Contact Form (Using Javascript Validations)
- Made the Website responsive
- Helped Zobia with the linking of the pages

Sameer:

- Did the coding for FAQ and Location page
- Wrote content and selected images for Sports, Gaming and Movies Categories
- Selected Images for Fashion, TV Shows and Trends Categories
- Made the dropdown for navbar (as it initially didn't have one)

Zobia:

- Wrote content for Fashion, TV Shows and Trends Categories.
- Linked all the Website pages

POSSIBLE QUESTIONS

We are going to answer some of the possible questions that may arise in your mind after seeing this report

Have you changed your project idea or is it still what you proposed?

It is 100% inline with the idea that we proposed.

Did you take any help from the internet or are certain portions of the website elements copied?

Yes, we did take a lot of help from the internet. **But all of the elements of our website pages were made by us** & yes few of tags of our website are copied but, I would like to clarify that the elements that tags were copied weren't just took from a site and posted. Absolutely not, instead we styled them according to our own website and only then added them on our site.

*You weren't taught JQuery but you are using JQuery in your project?
How and why?*

You are absolutely right about that we weren't taught JQuery but since we got a couple days off before the lockdown, we decided to get ourselves familiar with JQuery to get our desired output.

Why didn't you use bootstrap for this website?

Because none of us (Rameen, Sameer, Zobia) knew Bootstrap and we did try to watch tutorials and learn from it. But, we weren't able to get a good grasp on it. So, we decided to leave bootstrap out of the project.

Why did you add animations?

We added the animation effect to make it more interactive since life styles blog websites are supposed to be very interactive.

Why does your website have a charity portion too?

Lots of bloggers support some charity causes have their own charity projects we decided to have our own charity project. It provides water in those remote areas where people don't have any access to water. We will be expanding this and also start providing food to those who have to sleep hungry. We believe food and water is a basic human right and no one should be deprived of that

Why is your charity project named Todo Smiles?

We decided to name the charity Todo Smiles because when we provided water to the areas that didn't have access to it the smile that spread on their face was priceless. It made us work even harder to that so that's why we kept it Todo Smiles.

Did you fulfil the project requirements?

Yes we fulfilled all the project requirements. Our website has:

- 53 pages
- 500+ images
- It is **responsive**
- Slider
- Form (using Javascript Validation)
- Dropdown Menu
- Animations

What About the Racing Games like NEED FOR SPEED?

Need for Speed is a racing video game franchise published by Electronic Arts and currently developed by Criterion Games, the developers of Burnout. The series centers around illicit street racing and in general tasks players to complete various types of races while evading the local law enforcement in police pursuits.

CHARITY PROJECT PAGE (TODO SMILES)

Todo Smiles - Help us bring smiles to a child's face

Donate

What is Todo Smiles?

Nonprofit that brings clean and safe drinking water to people in developing countries.

100% of the nonprofit's public donations go directly to clean water technologies that range from wells to water filtration. Answering this basic human need, charity:water offers a lot of opportunities to get involved, from volunteering to fundraising. One creative way to raise funds is to pledge your birthday, a campaign in which individuals decide that instead of receiving gifts, friends and family are encouraged to donate to charity:water.

Our Missions:

Our mission is to break the cycle of poverty, restore dignity, and inspire dreams one community at a time. That's why Todo's team is making life long impact in some of the most poverty stricken countries in the entire world. From drilling water wells in countries like Uganda, Zambia, Rwanda, and the Central African Republic, to providing medical supplies and professional training to fight deadly diseases in communities in India and Cambodia, Generosity.org, along with all of our tens of thousands of supporters like you, are making a life worth living possible for hundreds of thousands of people. See everything you all have helped us do in Africa, Central America, Asia, and the Caribbean to help communities thrive and continue to join with us as the world sees a new breed of generosity.

In the vast majority of third world countries, their options are very limited. Do they walk and get clean water to drink and bathe with? Or do they go without in order to go to school and better their lives, families, and other communities? That is a choice that never needs to be made and we intend for people all over the world to not have to make that choice ever again. We believe in the power of education, but our belief goes further than that. We believe a young woman in rural Uganda will discover the cure for cancer if only she is given the opportunity to get a quality education. We believe a young boy in Haiti can rise up beyond poverty and inspire millions of people with his story if only there is a library available so he can learn to read.

What we have done:

Our team, along with closely related partners, were sent out into the communities to update and repair old and damaged boreholes and wells. After much needed repairs were completed, new wells were then developed and drilled, and locals were then trained to maintain these new water sources providing long lasting water resources as well as ongoing economic opportunities.

Our ground team's activities focused on the repair of older and broken boreholes. The team coordinated closely with the District Water Department to select boreholes in the most needed communities. Major repairs were completed to meet the communities needs and restore life through water. To ensure future sustainability of the boreholes, our team facilitated the formation of a Water User Committees (WUCs), comprised of local community leaders. The WUCs collect fees for maintenance of the borehole each month, ensuring that the area is kept clean, well maintained, and free of livestock.
